

Contactless Control

QR Code Feature - NEW

We've done the hard work so it's easy for you to have a contactless meeting room booking experience.

Concierge Displays' new feature allows you to mirror the meeting room display on your smartphone for frictionless workflow.

HOW THE QR CODE WORKS

1. Simply use your smart phone's camera to capture the disposable QR code. Point the camera at the QR code to be scanned.
2. Click on the URL pop up to view and book the room's display.
3. Enjoy all the features available on the physical display. Such as booking now, future, cancelling a booking and more.

The easy to use feature requires **no app** or server configuration, is completely **browser-based** and **secure**.

Use the feature on your phone's **Wi-Fi** or **mobile 4G network**. The IT friendly feature is designed with maximum network interoperability in mind.
