CONCIERGE DISPLAYS

# ACMGMP2
## Media Player

Our new 4k Media Player is the solution for when you are looking for meeting room management capabilities for your own touch display. If your display is Touch Enabled, it also allows for the same user interaction as our Concierge panels.

The media player is locked with the Concierge software and can be easily integrated in conjunction with third party displays. Ideal for when you want to use a bigger screen, our Media Player can be easily used with your own display (and it's POE ready).

## KEY FEATURES

### High quality viewing
Enjoy high resolution meeting room booking with your display. Have the ability to display full calendar information booking on your own screen.

### Customisable screens
With our media player, your screen will have the ability to display the full calendar – daily, weekly or monthly booking information. Adjust the screen skins, text and logo. You can also add in videos onto the displays.

### Easy to use
With your screen book rooms immediately or for a future date or time, have the ability to extend or finish your booking early. Your AV room features are also displayed on screen and report room feature errors through the display.

### Room booking and summary modes
Our media player is customised to conveniently function in two modes, the Room Booking mode displaying one meeting room's availability and the Summary mode summarising multiple meeting rooms availability.

### Simple to integrate and setup
Our media player can be easily integrated into your space and your display screen with its power supply LAN, wireless capabilities and HDMI input.

### Get the most out of your room analytics
Use our complimentary program to track and monitor your meeting room management and utilisation. See more about our program, Companion.

### Seamless Customisation
Easily adjust your display to suit your working environment and branding. Adjust the logo, text, font and colour yourself or download one of our pre-made skin designs. Have the ability to add videos onto the display.

## COMPATIBILITY

Scientia.Publish For Syllabus Plus    Google G Suite    E☒ Exchange    Office 365    CELCAT    nfs

The Concierge Room Booking Media Player provides all of the features of our 10" panel, but allows for your own display of any size. It uses a simple green and red display to instantly notify whether the room is available or in use. If your display is Touch Enabled, it also allows for all the same user interaction as our 10" Panel.
